Experience

- * Designed and Created a film app which calls back to an API to fetch data, a prop is then passed through React Router using the useParams function to then call to another API for a description page.
- * Built a website using React as a framework. The website uses React Router V6 to link between home, about, portfolio and a CV page. This app has a responsive user interface with animation built using Framer motion.
- * Completed several development courses including the pet adoption app course on Frontend Masters along with a Udemy course on Javascript by Jonas Schmedtmann, and currently completing a course; 'javascript: the hard parts by Will Sentance also on Front End Masters.

Key Skills

- Experience building React applications
- Working knowledge of React
- Node package management and GitHub repository
- Command over HTML, CSS and Javascript libraries including JSX
- Knowledge of tools such as Prettier, ESLint, React Router DOM, Framer Motion
- Experience testing and troubleshooting UI/UX
- Background in web design (Squarespace , Shopify)
- Experience hosting websites through Netlify and linking to a personal domain
